

Ease of use

PROTECT Office.

10 YEARS WARRANTY

Compact protection for PC and peripheral equipment

Surges can be caused, for example, by lightning striking your premises. Lightning induces voltage surges in conductors and cables that can damage any connected equipment. Also switching in households, for example with fluorescent lamps and conventional ballast, can cause surges in the buildings wiring system. Effective protection provides AEG's surge protector series.

PROTECT Office. is the compact power distribution for your desktop. The 3 power outlets and network ports provide complete computer protection. During the development phase, the compactness of design was paramount. The design also allows you to connect a microphone and speakers. As a result, the annoying cable clutter on and behind the desk can be avoided. Any peripheral units can be switched off via the central power button thereby reducing standby costs.

Key features:

- 3 protected sockets, one of them rotateable
- 2 protected USB chargers
- data-line protection for network cable (RJ45)
- additional connectors for microphone and headset audio cable extension included
- surge protection up to 36.000 A

PROTECT Office: technical specifications

Category III / D / T3 acc. to IEC 61643-1	PROTECT Office.
Nominal input voltage	230 Vac, 50 / 60 Hz
Mains input	angled safety plug
Load outlets	3 x safety sockets, one of them rotateable
Safety standard	KEMA-KEUR, KEMA GS
Protections technology	triple conductor L-N / L-PE / N-PE
Surge protection	up to 36.000 A
Dimensions approx. (B x H x D)	120 mm x 93 mm x 100 mm
Weight approx.	0,7 kg
Part number	600 000 7746
